

Oilfield & Drilling Products

Keep your jobsite clean and safe with Pigmalion containment and absorbent products.

Oilwik™ Absorbent Pads

Oilwik™ brand absorbent pads are the most economical choice for the clean-up of leaks, drips and spills at your site. Oilwik™ pads absorb oil and other hydrocarbon-based liquids while repelling water. They also float and can be used for the clean up of an on-water spill. Oilwik™ pads have a layer of spunbond fabric which provides strength and a low-lint surface that parts or equipment can be placed on. All pads are perforated so you can tear-off only what is required.

Oilwik™ Wellhead Sock

Wellhead Socks capture leaks around the wellhead pump while repelling water. Velcro straps hold the sock in-place and there are 10 socks per bag.

Oversize Absorbent Rig Pads

Oversized Absorbent Rig Pads can be used at well or drilling heads to capture liquids and keep areas clean. Oil-only polypropylene absorbs 20 times its weight while the poly-backing ensures liquids do not leak to the underside of the pad.

NAME	PART#	SIZE	QTY
Oilwik™ Absorbent Pads	OSC100	38cm x 48cm	100/Bag
Insta-Berm™ Outdoor Containment	IBLR101512	3m x 4.5m x 30cm	1 Unit
Pigmalion Rig Rug	SM8300H	92cm x 45m	1/Bag
Oversize Absorbent Rig Pads	ABSRUG48	145cm x 15m	1/Bag
Oilwik™ Wellhead Sock	WHSO10	13cm x 1m	10/Bag

Pigmalion Rig Rug

An industry standard for years, Pigmalion's Rig Rug is specifically designed for the drilling industry. Superior tensile strength enables our Rig Rug to withstand the toughest conditions around rigs, heavy equipment, and in drilling or compressor houses. Keep work areas clean and safe while protecting expensive equipment and the environment with Pigmalion's Rig Rug.

Insta-Berm™

Outdoor Containment

Prevent or contain spills at drilling sites with Insta-Berm™ portable containment. Fully-collapsible and made from heavy-duty, chemical-resistant fabric, Insta-Berms™ can be set-up on any jobsite to create an impenetrable layer between liquids in stored drums or totes, and the environment. Available in many sizes, configurations and with Arctic temperature rated fabric.
